Eyes : Causes serious eye irritation. Blurred vision May cause impairment of vision and corneal damage

Ingestion : Ingestion of high concentrations may cause injuries to gastrointestinal tract, liver and kidneys. Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.

Chronic Exposure : Repeated inhalation exposure may cause impairment of lung function and permanent lung damage. Effects from chronic skin exposure would be similar to those from single exposure except for effects secondary to tissue destruction.

NTP: No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

Skin contact : Take off contaminated clothing.

Ingestion : Call a poison control center or doctor immediately for treatment advice.

Inhalation : Move person to fresh air.
• If breathing is difficult oxygen may be beneficial if administered by trained personnel.
• If breathing has stopped, apply artificial respiration.
• Call a physician or poison control center IMMEDIATELY.

General advice:
• Have the product container or label with you when calling a poison control center or doctor or going for treatment.
• Show this safety data sheet to the doctor in attendance.

Notes to physician:
Comments:
• Probable mucosal damage may contraindicate the use of gastric lavage.

SECTION 5. FIRE-FIGHTING MEASURES

Flammable properties:
Flash point: not applicable
Lower explosion limit: not applicable
Upper explosion limit: not applicable

Fire fighting:
Suitable extinguishing media:
• Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
• On small fire, use dry chemical, carbon dioxide or water spray.
• On large fires, use water in flooding quantities as fog.

Unsuitable extinguishing media:
• Do not use Mono Ammonium Phosphate (MAP) type extinguishers directly on this product.

Further information:
• Cool containers / tanks with water spray.

Protective equipment and precautions for firefighters:
Specific hazards during fire fighting:
• Corrosive

Special protective equipment for fire-fighters:
• Additional protective clothing must be worn to prevent personal contact with this material. Those items include but are not limited to: boots, gloves, hard hat, splash-proof goggles, full face shield and impervious clothing, i.e. chemically impermeable suit.
• Compatible materials for response to this material are neoprene and butyl rubber.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions:
• Restrict access to affected area.
• Use personal protective equipment.
• Use NIOSH approved respiratory protection.
• Keep people away from and upwind of spill/leak.

Methods for containment / Methods for cleaning up:
• Try to prevent the material from entering drains or water courses.
• Prevent further leakage or spillage if safe to do so.
Inform the responsible authorities in case of gas leakage, or of entry into waterways, soil or drains. Will form hazardous reaction products. Suppress (knock down) gases/vapours/mists with a water spray jet. Contain spillage, soak up with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and transfer to a suitable container for disposal according to local / state / province/national regulations (see section 13).

Additional advice:
- Dispose of as hazardous waste in compliance with local, province, state and federal regulations.
- You are requested to contact the emergency numbers listed below before beginning any such operation.

FOR ALL ACCIDENTS, CALL CHEMTREC AT 1-800-424-9300 OR NEWALTA (IN CANADA) AT 1-800-567-7455.
